「Lagman is a famous dish from central Asia.」

「It is tastier than Udon?」

「The dish varies a lot from place to place. Generally though it contains a lot of lamb. It's delicious.」

「When I think of udon, nothing else beats sanuki udon.」

「They say that lagman got its name from ramen.」

「There are people who believe that udon is important for the lower back, but I'd say that this would only work for tender udon found in the Kansai region.」

「But there are also those who say that ramen actually got its name from lagman through *ragman*. They both came from the Silk Road after all. If you get the chance, try some!」
